

Weekend with Unstable Weather in Most Coffee-Producing Areas

HIGHEST OBSERVED MONTHLY RAINFALL
SSP | 107 mm

HIGHEST FORECAST RAINFALL
SES 08/11 | 23 mm

LOWEST OBSERVED TMIN
BA | 17,3 °C

HIGHEST FROST RISK
PAR | None

OBSERVED WEATHER

Maximum and minimum temperatures observed on the previous day (05/11/2026).

Region	Minimum Temperature (°C)	Maximum Temperature (°C)
PAR	20,4	28,2
SSP	22,6	29,1
AMOG	20,2	31,2
BMOG	19,0	27,8
SMG1	19,4	30,2
SMG2	19,4	30,3
CER	18,0	31,6
ZM	20,0	32,5
NES	22,4	34,8
SES	19,2	33,0
BA	17,3	34,2

Minimum temperature <= 5 °C Maximum temperature >= 30 °C

Daily accumulated rainfall from the previous three days and monthly accumulated total to date. The monthly accumulation considers the period from 01/11/2026 to 05/11/2026.

Region	Observed Accumulated Rainfall (mm)			
	03/11	04/11	05/11	Monthly total
PAR	0	4	47	99
SSP	0	7	3	107
AMOG	0	0	3	31
BMOG	0	0	14	27
SMG1	0	1	17	41
SMG2	0	0	8	16
CER	21	18	16	51

NES	0	0	0	14
SES	0	6	27	45
BA	0	0	0	2

Moderate 30 to 60 mm Heavy 60 to 100 mm Extreme above 100 mm

NEXT 5 DAYS ANALYSIS

This Friday, a cold front advancing over the ocean spreads and intensifies instabilities across the Southeast region. Until the weekend, rain showers will gain intensity even over the northern areas of Minas Gerais, Espírito Santo, and southern Bahia, with volumes of 20 to 30 mm in the most affected areas. On Saturday and especially on Sunday, new instabilities will reinforce rain in the Southeast. Localized accumulations of 50 to 60 mm are expected in areas of São Paulo and 30 to 40 mm between Minas Gerais and Espírito Santo. With the rain, heat is likely to decrease mainly starting Sunday.

RAINFALL FORECAST

Forecast daily accumulated rainfall (mm) for the next 5 days.

Region	06/11	07/11	08/11	09/11	10/11
PAR	6	14	1	0	0

EXTENDED FORECAST ANALYSIS

At the beginning of next week, between Monday and Tuesday (9th and 10th), instabilities will be more concentrated in the northern half of Brazil. In the coffee-producing areas, rainfall may be more intense and persistent in Cerrado Mineiro, central and northern Minas Gerais, Espírito Santo, and Bahia, with accumulations of 30 to 50 mm in many locations. Meanwhile, in the south-central part of the country, a dry and cold air mass favors clearer weather and a drop in temperatures. Mornings will be cooler: on Tuesday (10th), minimum temperatures may reach 12 °C in areas of the interior of São Paulo and southern Minas, and around 10 °C in the coldest areas of Minas Gerais.
