Unchecked data from airport reports

#### Next five days:

An extratropical cyclone in the ocean is bringing very windy weather to the south-central part of the country this Wednesday, but the rains are expected to move away and advance to the northern half of the country. In the second half of the week, moderate rains will spread between Espírito Santo, northern Minas Gerais, and Bahia, while in the south-central part of the country, conditions for rain will decrease between Wednesday and Thursday.

### Weather/RainFall(mm) in Coffee regions

Attention: Each data above is the accumulated rainfall in the last 24 hours, collected from official meteorological stations, at 12:00 GMT (9:00 am local time) of the day. That values are interpolated to a grid point format, and indicates the mean rainfall of each region.

### Extended Forecast:

Starting Friday, new instabilities will return to the South of the country, where heavy rains and storms are forecast. Over the weekend, a cold front will advance along the Southeast coast, causing more widespread rains with moderate volumes over coffee-producing areas between São Paulo and Minas Gerais.
