

## Dry and hot weather favors ripening and harvesting in the coming periods.

### Current Weather (24-04)

	PAR	SSP	AMOG	BMOG	SMG1	SMG2	CER	ZM	NES	SES	BA
MN	20	20	18	20	19	18	18	20	24	19	19
MX*	26	28	30	28	29	30	31	26	29	27	31

Unchecked data from airport reports

#### Next five days:

Over the weekend, dry and hot weather will prevail across most coffee-producing areas. Temperatures will continue to rise, with highs expected to approach 35°C in inland locations in the Southeast region. Isolated rain showers are expected in northern Espírito Santo and southern and western Bahia.

## Observed daily rainfall and Total/Normal in the April

Region	21-04	22-04	23-04	Total	Média	Desvio(%)
PAR	2	0	0	57	94	-40
SSP	3	3	0	59	103	-42
AMOG	0	0	0	61	78	-21
BMOG	0	0	0	23	65	-65
SMG1	0	0	0	15	77	-81
SMG2	0	0	0	57	88	-35
CER	0	2	0	39	71	-45
ZM	0	0	5	29	57	-49
NES	0	0	13	53	123	-57
SES	0	0	14	49	93	-47
BA	0	0	0	19	57	-67

Attention: Each data above is the accumulated rainfall in the last 24 hours, collected from official meteorological stations, at 12:00 GMT (9:00 am local time) of the day. That values are interpolated to a grid point format, and indicates the mean rainfall of each region.

### Extended Forecast:

Early next week, a cold front will move in from the south of the country, bringing isolated rainfall to areas between Paraná and São Paulo. However, the rain is not expected to extend far into the interior of the Southeast region, and dry weather is expected to prevail over most coffee-growing areas throughout next week.
