SES	0	0	0	124
BA	0	0	0	22

Moderate 30 to 60 mm Heavy 60 to 100 mm Extreme above 100 mm

📅 NEXT 5 DAYS ANALYSIS

The advancement of a new cold front will favor rainfall at the beginning of October in the Southeast of Brazil. On Thursday (01), the weather will still be muggy, and rain showers are expected especially between the afternoon and evening in the coffee-growing areas of São Paulo and Minas Gerais. There is a risk of localized storms, with lightning and strong wind gusts. In northern Paraná, storms have already occurred between the early morning hours, and the weather will remain unstable with more periods of rain throughout the day. For Bahia, the forecast is strong sun, very hot temperatures, and dry weather. From Friday (02) to Sunday (04), the chances of rain are high and temperatures will decrease in all the coffee-growing areas of the Southeast. Significant accumulations are forecast, especially for southern Minas Gerais and the Zona da Mata Mineira. In Paraná, storms will return on Sunday.

RAINFALL FORECAST

Forecast daily accumulated rainfall (mm) for the next 5 days.

Region	01/10	02/10	03/10	04/10	05/10

📅 EXTENDED FORECAST ANALYSIS

Between Monday (05) and Wednesday (07), areas of the South and Southeast of the country will continue experiencing unstable weather. A new cold front is expected to form during this period, and the trend is for frequent rain showers in Paraná, São Paulo, southern Minas Gerais, Zona da Mata Mineira, and the Cerrado Mineiro. There is a risk of storms. On Thursday (08), rainfall

conditions will decrease in these areas. In Bahia, next week will be marked by sun and heat.
